EXECUTIVE SUMMARY

Creative software and music engineer with a passion for creating scalable applications using the PERN stack as well as other resources. My previous role as an audio engineer has taught me the importance of automation to increase efficiency, while familiarizing myself with the newest technology in the industry. My passion for creating innovative solutions for users has heightened since I completed my studies at General Assembly. In addition, I have excellent people skills able to build and maintain quality relationships. I'm an attentive listener, articulate, and proficient communicator familiar with team-related or individual task assigned environments. Client relations, team building, and staff management abilities. Additional related skilled keys to success include:

- Javascript
- HTML
- CSS
- Node.js
- SQL
- Express.js
- React.js
- Jquery
- Python

PROFESSIONAL EXPERIENCE

24-7 In-Touch, Aurora, CO   04/2019 – 06/2020
Trust & Safety Agent
- Ensuring PCI Compliance
- Enforce company policy and mitigate poor end-user experience
- Utilized internal resources to insure user property
- De-escalating users in high stress situations while maintaining customer retention and security

Freelance, Atlanta, GA   01/2015 – 04/2019
Freelance Audio Engineer
- Scheduling and operating recording sessions for clients
- Networking at industry events to gain clients and studio bookings
